

## STORYTELLING

Become a storyteller and write your own story to share with others

Before you start..... here are a few hints and tips to make your story work well!

First decide on your theme, scary, mystery, comedy, romance, magic or perhaps you will include all of these.

Next decide on your list of characters, give them names and think about how you will describe them in your story.

Decide on a time and place for the action to take place in, real places or imaginary and think of the words that will describe them so that you can set the scene.

Try to get a balance between action and description to keep your story interesting. Good Luck!

Once upon a time
